We offer you an easy solution for Econt integration of your WordPress e-shop if it uses the WooCommerce plugin. In this way, you will only prepare your shipments and we will deliver them to your customers instead of you. The installation and configuration of the module are done in a few easy steps.

## Econt shipping module installation and settings

### Step 1

Make sure your WordPress e-shop has the WooCommerce plugin installed.

We recommend having the latest version installed.

Before installing the plugin:

From the WordPress admin panel, check the following WooCommerce settings and, if necessary, correct them according to the instructions below:

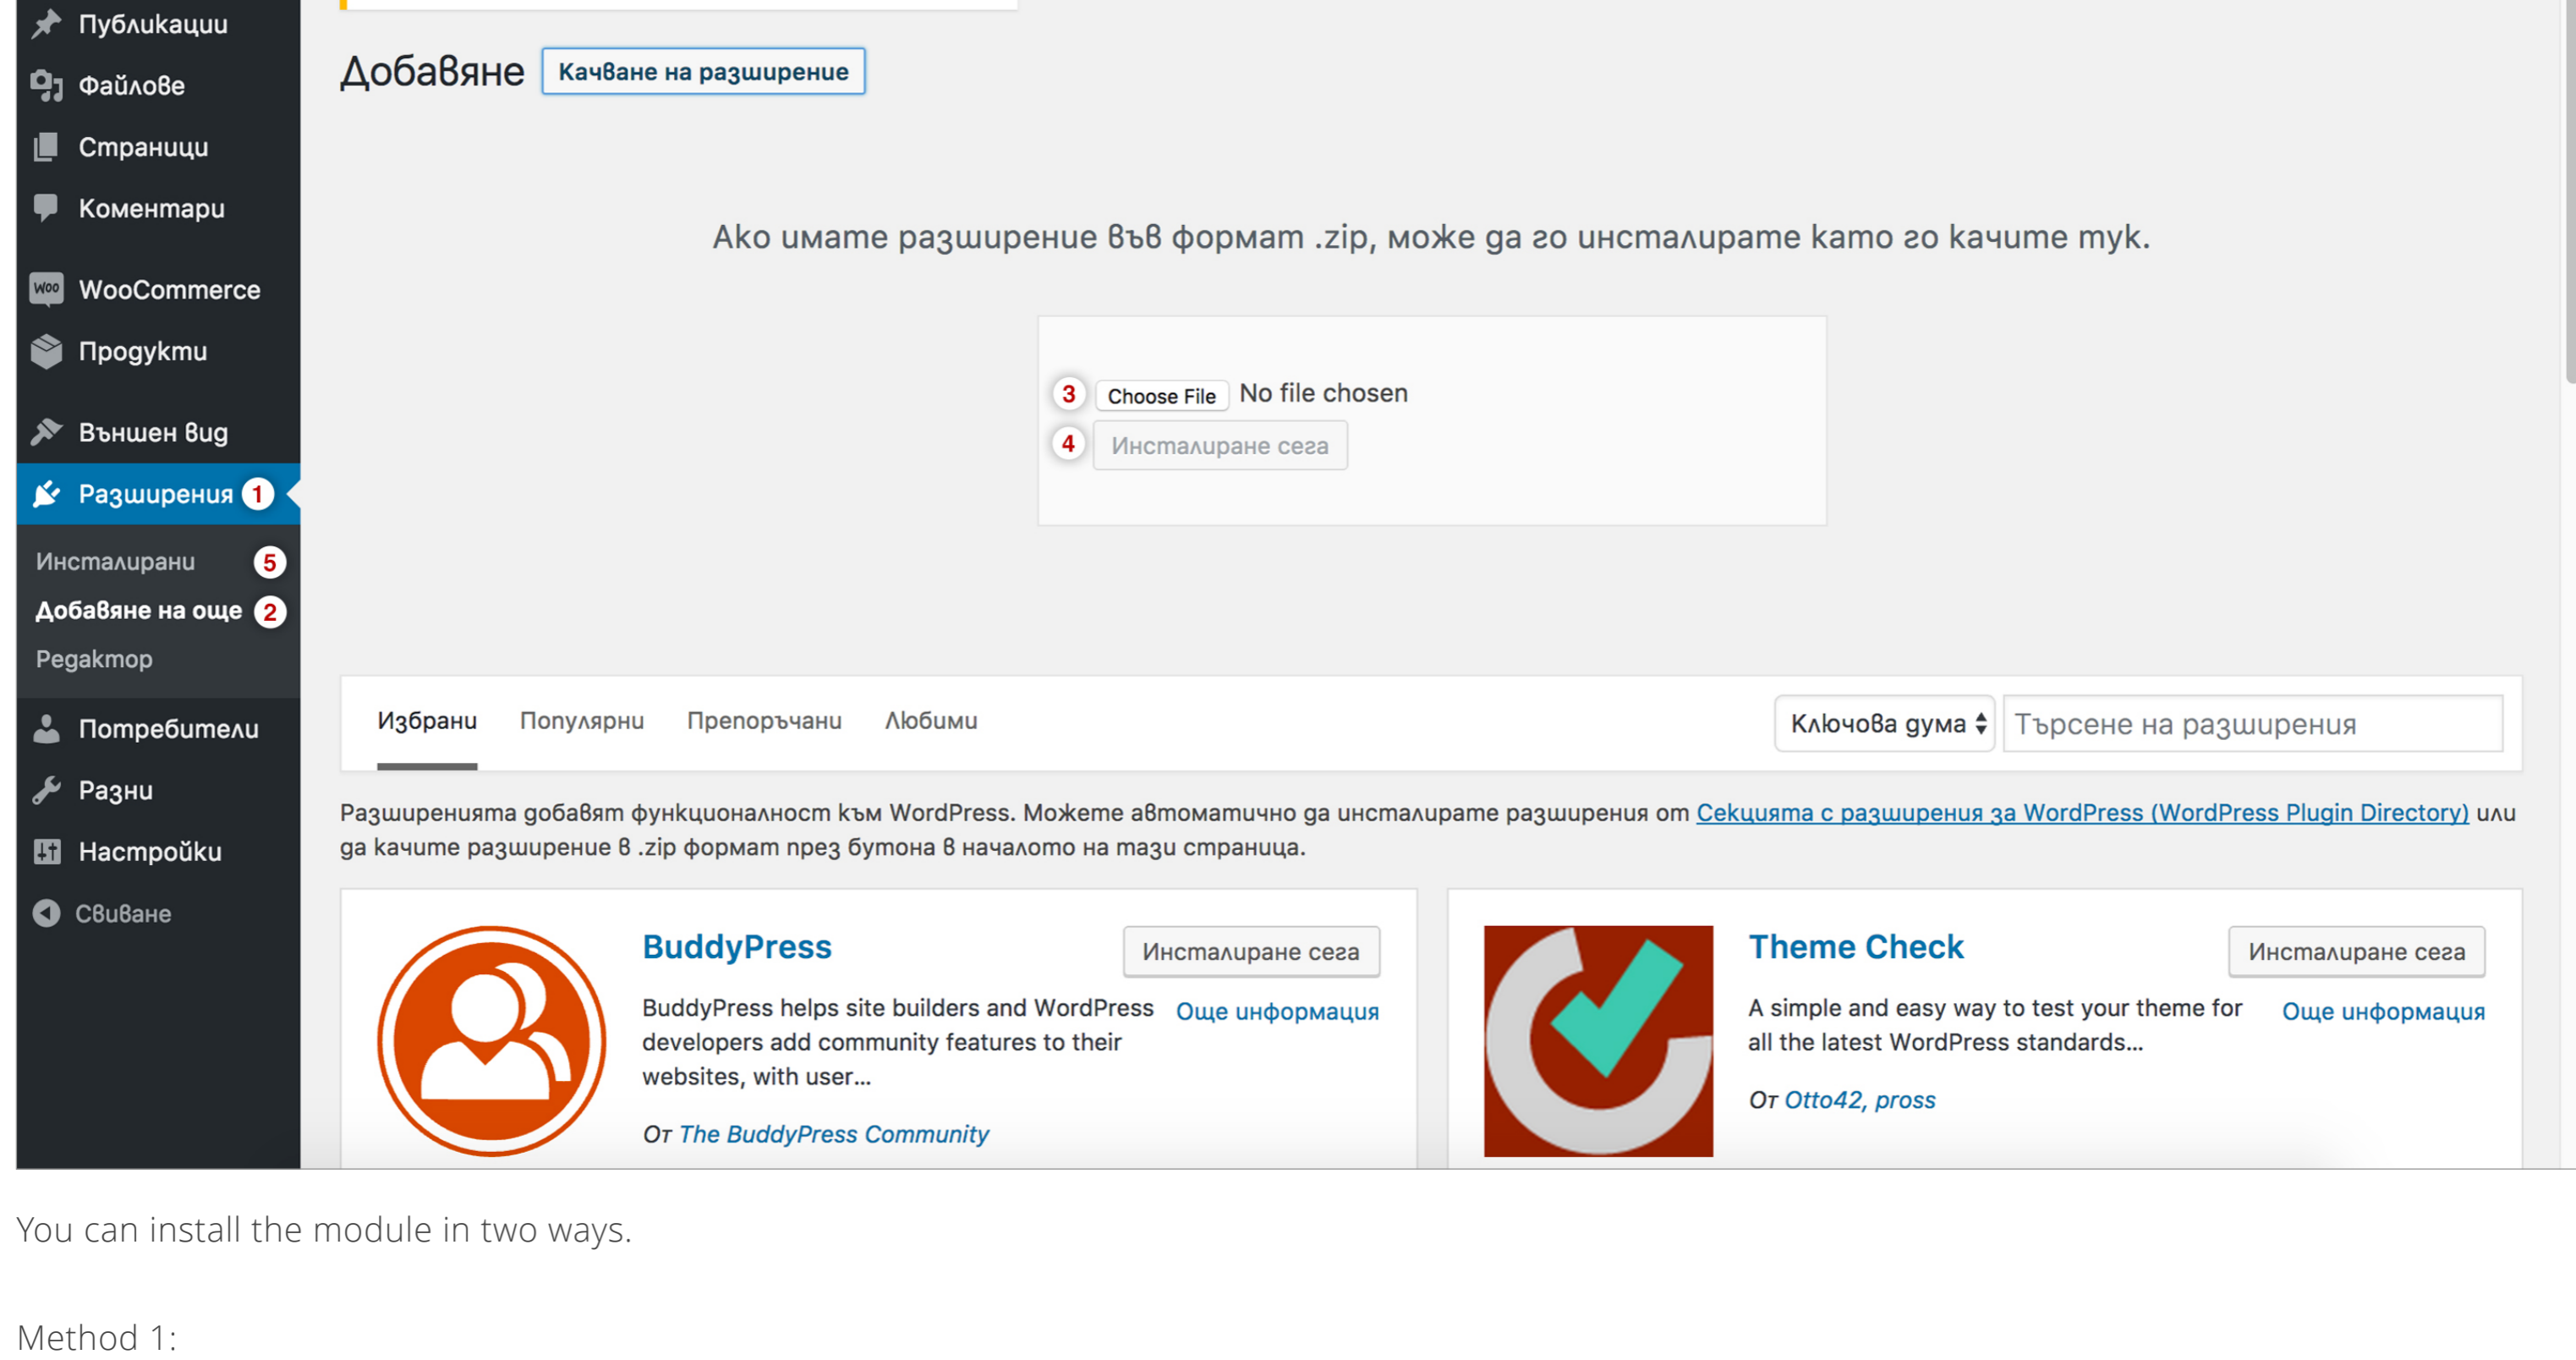

- In WooCommerce -> *Настройки* -> *Основни* -> *Местоположение за доставяне*, the option *Изключване на доставките и изчисленията за доставка* must be disabled.
  - In WooCommerce -> *Настройки* -> *Основни* -> *Местоположение по подразбиране* for the customer, we recommend enabling the option *Седлище на магазина*
  - In WooCommerce -> *Настройки* -> *Основни* -> *Опции за валута* -> *Валута*, select *български лев*
  - In WooCommerce -> *Настройки* -> *Основни* -> *Опции за валута* -> *Позиция на символа за валута*, select *Дясно*
  - In WooCommerce -> *Настройки* -> *Основни* -> *Опции за валута* -> *Разделител на хилядите*, select *," (comma)*
  - In WooCommerce -> *Настройки* -> *Основни* -> *Опции за валута* -> *Десетичен знак*, select *," (decimal point)*
- In WooCommerce -> *Настройки* -> *Основни* -> *Опции за валута* -> *Брой на десетичните*, select *"2"*

- Check if the hosting server you use meets the system requirements of the plugin:

- PHP 5.3.x or newer
- MySQL 5.0.x or newer
- cURL PHP extension
- SimpleXML PHP extension
- max\_execution\_time >= 3600
- max\_input\_time >=3600
- memory\_limit >= 512M
- mysql wait\_timeout >= 3600
- mysql max\_allowed\_packet >= 32M
- server httpd\_can\_network\_connect = true

Download the installation files of the Econt Express shipping plugin for WooCommerce from [here](#)

### Step 2

You can install the module in two ways.

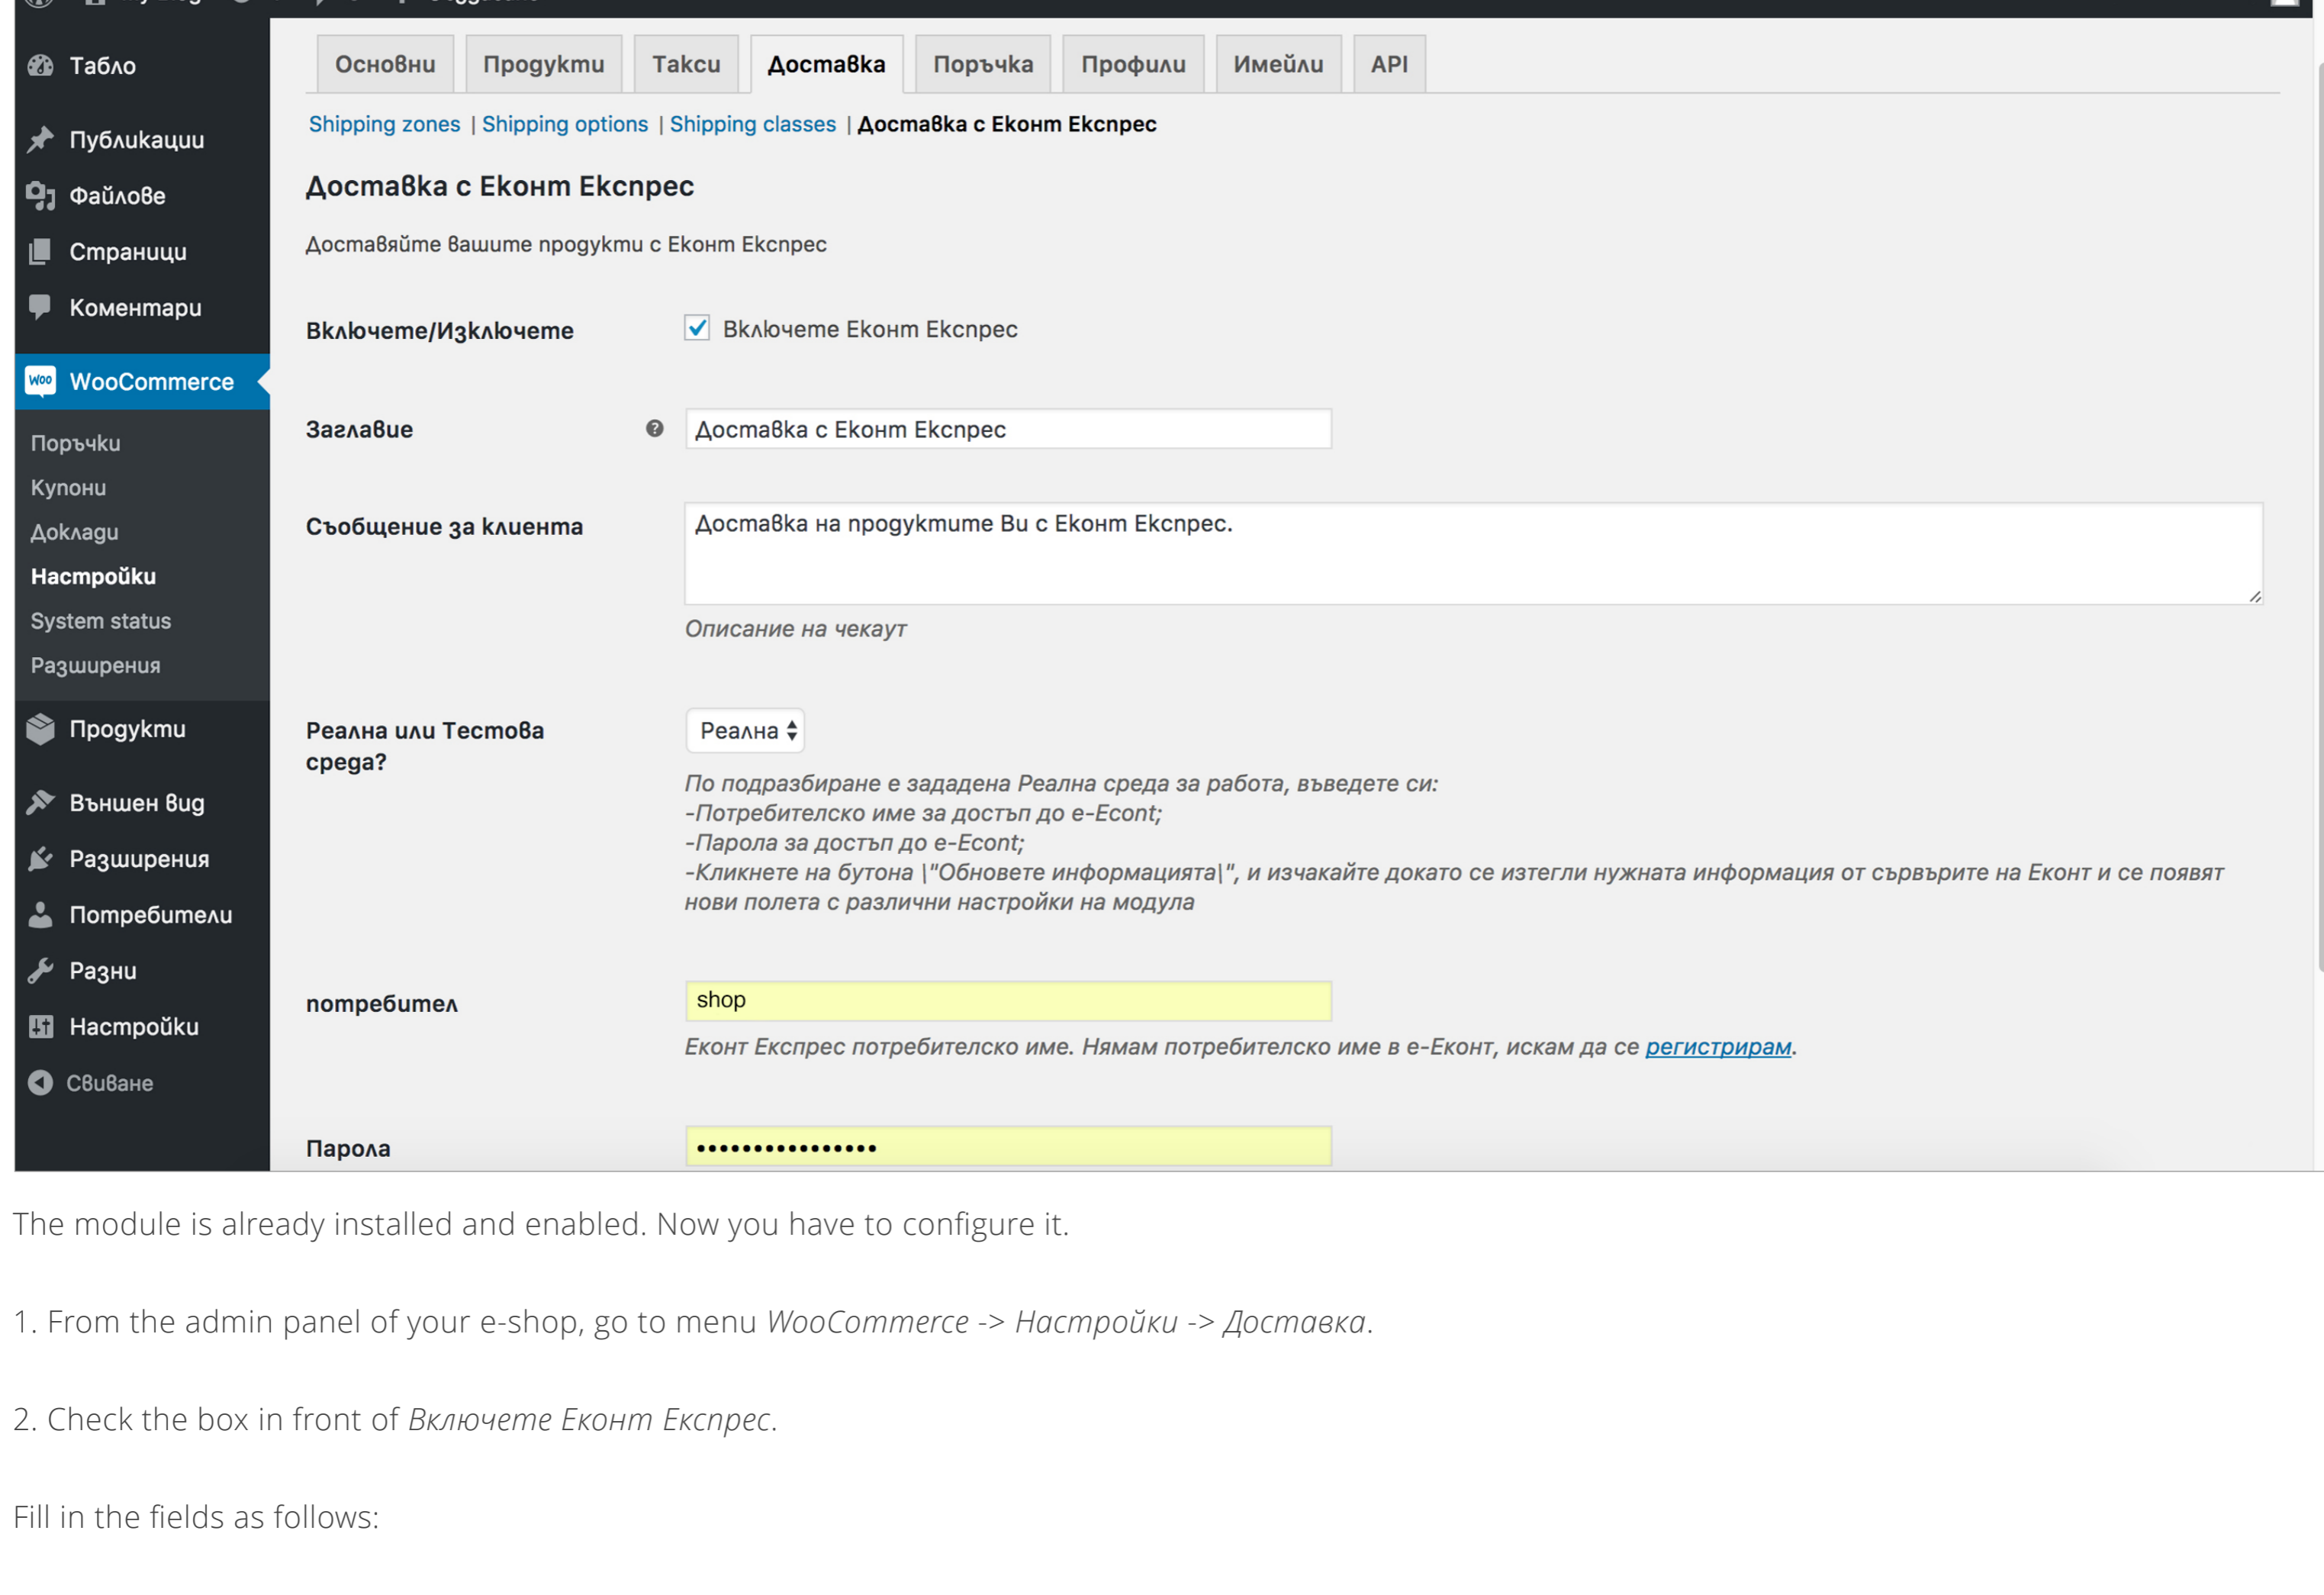

Method 1:

- Log into the admin panel of your WordPress e-shop.
- Go to menu *Разширения* -> *Добавяне на още (Plugins -> Add New)*.
- Press the *Browse* button and select the archive file *woocommerce-econt.zip*, which you downloaded in Step 1.
- Press the *Инсталирай* (Install) button.
- Go to section *Инсталирани разширения* (Installed Plugins). A new page will open.
- On line *Woo Commerce Econt Express Shipping plugin*, press the *Активирай* button.

Method 2:

- Extract the *woocommerce-econt.zip* file, which you downloaded in Step 1.
- KUpload the extracted files to the directory */wp-content/plugins/* of your e-shop using an FTP client (e.g. FileZilla) or any other method of file transfer.
- In the admin panel of your Wordpress e-shop, go to menu *Разширения* -> *Инсталирани (Plugins -> Installed Plugins)*.
- On line *Woo Commerce Econt Express Shipping plugin*, press the *Активирай* button.

### Step 3

The module is already installed and enabled. Now you have to configure it.

- From the admin panel of your e-shop, go to menu *WooCommerce* -> *Настройки* -> *Доставка*.
- Check the box in front of *Включете Еконт Експрес*.

Fill in the fields as follows:

In the *Заглавие* field, select *Доставка с Еконт*.

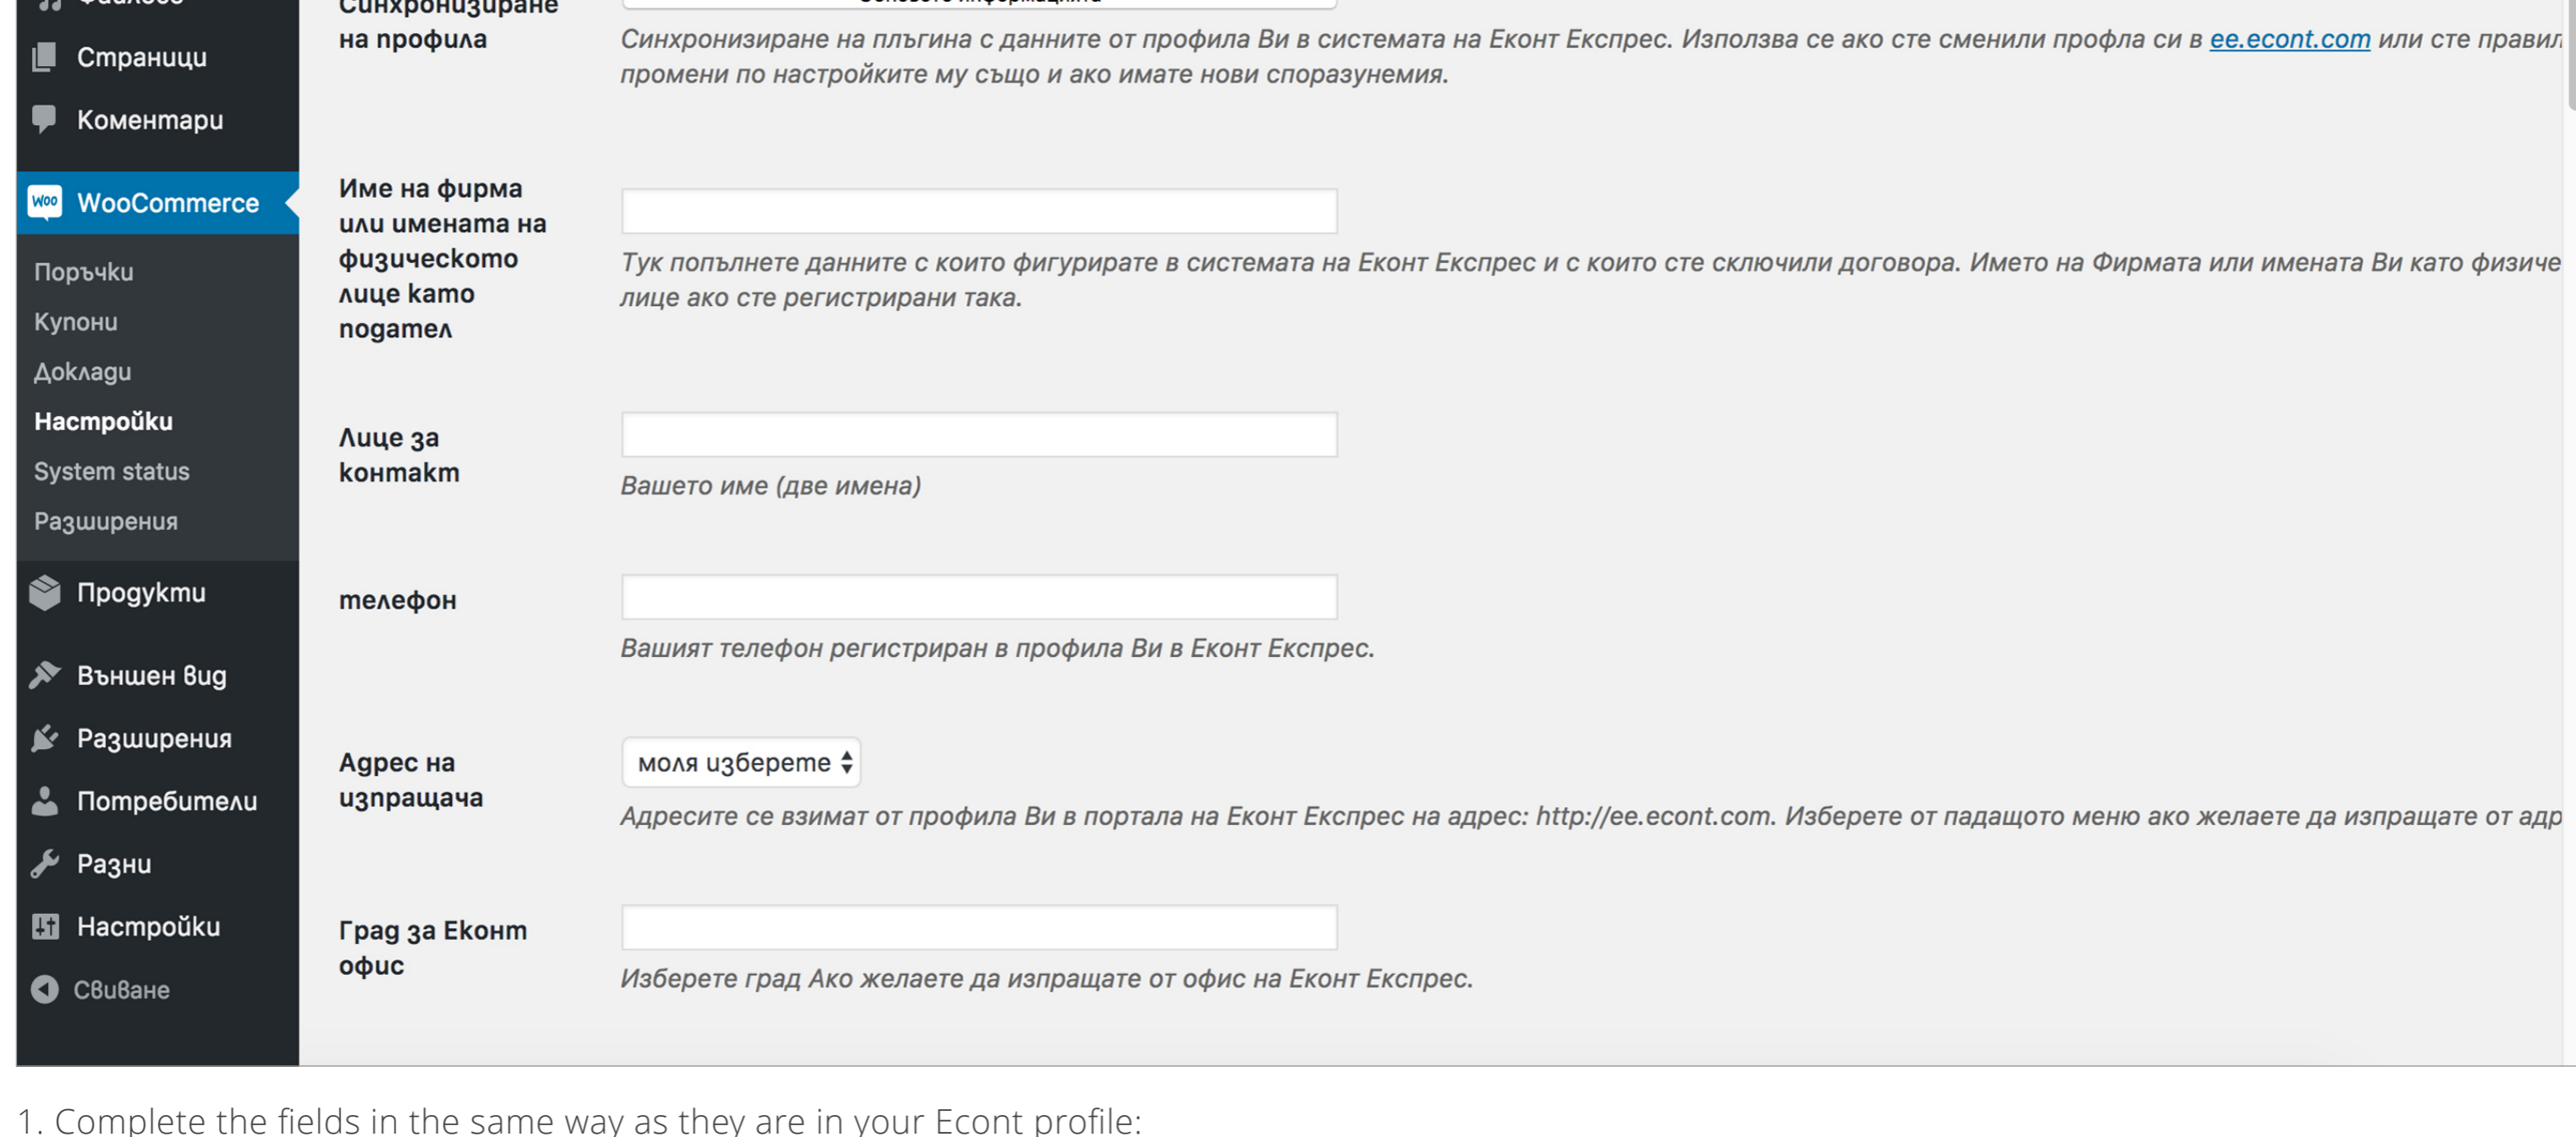

In the *Съобщение* field, enter a short description of the payment method (e.g. cash on delivery, free shipping for orders over BGN 50.00, etc.).

In the *Реална или Тестова среда* field, select *Реална*. If you only want to test the system, select *test*.

Enter your username and password for e-Econt.

- Scroll down to the end of the page and press the *Запазване на промените* button.
- Go back to line *Обнови данни* and press the *Обновете информацията* button..
- Wait for a few minutes without pressing anything else on the screen. The WooCommerce Econt Express plugin will synchronise the database for cities, offices, city quarters and streets with our server.
- On line *Синхронизиране на профила*, select the *Обновете информацията* button.

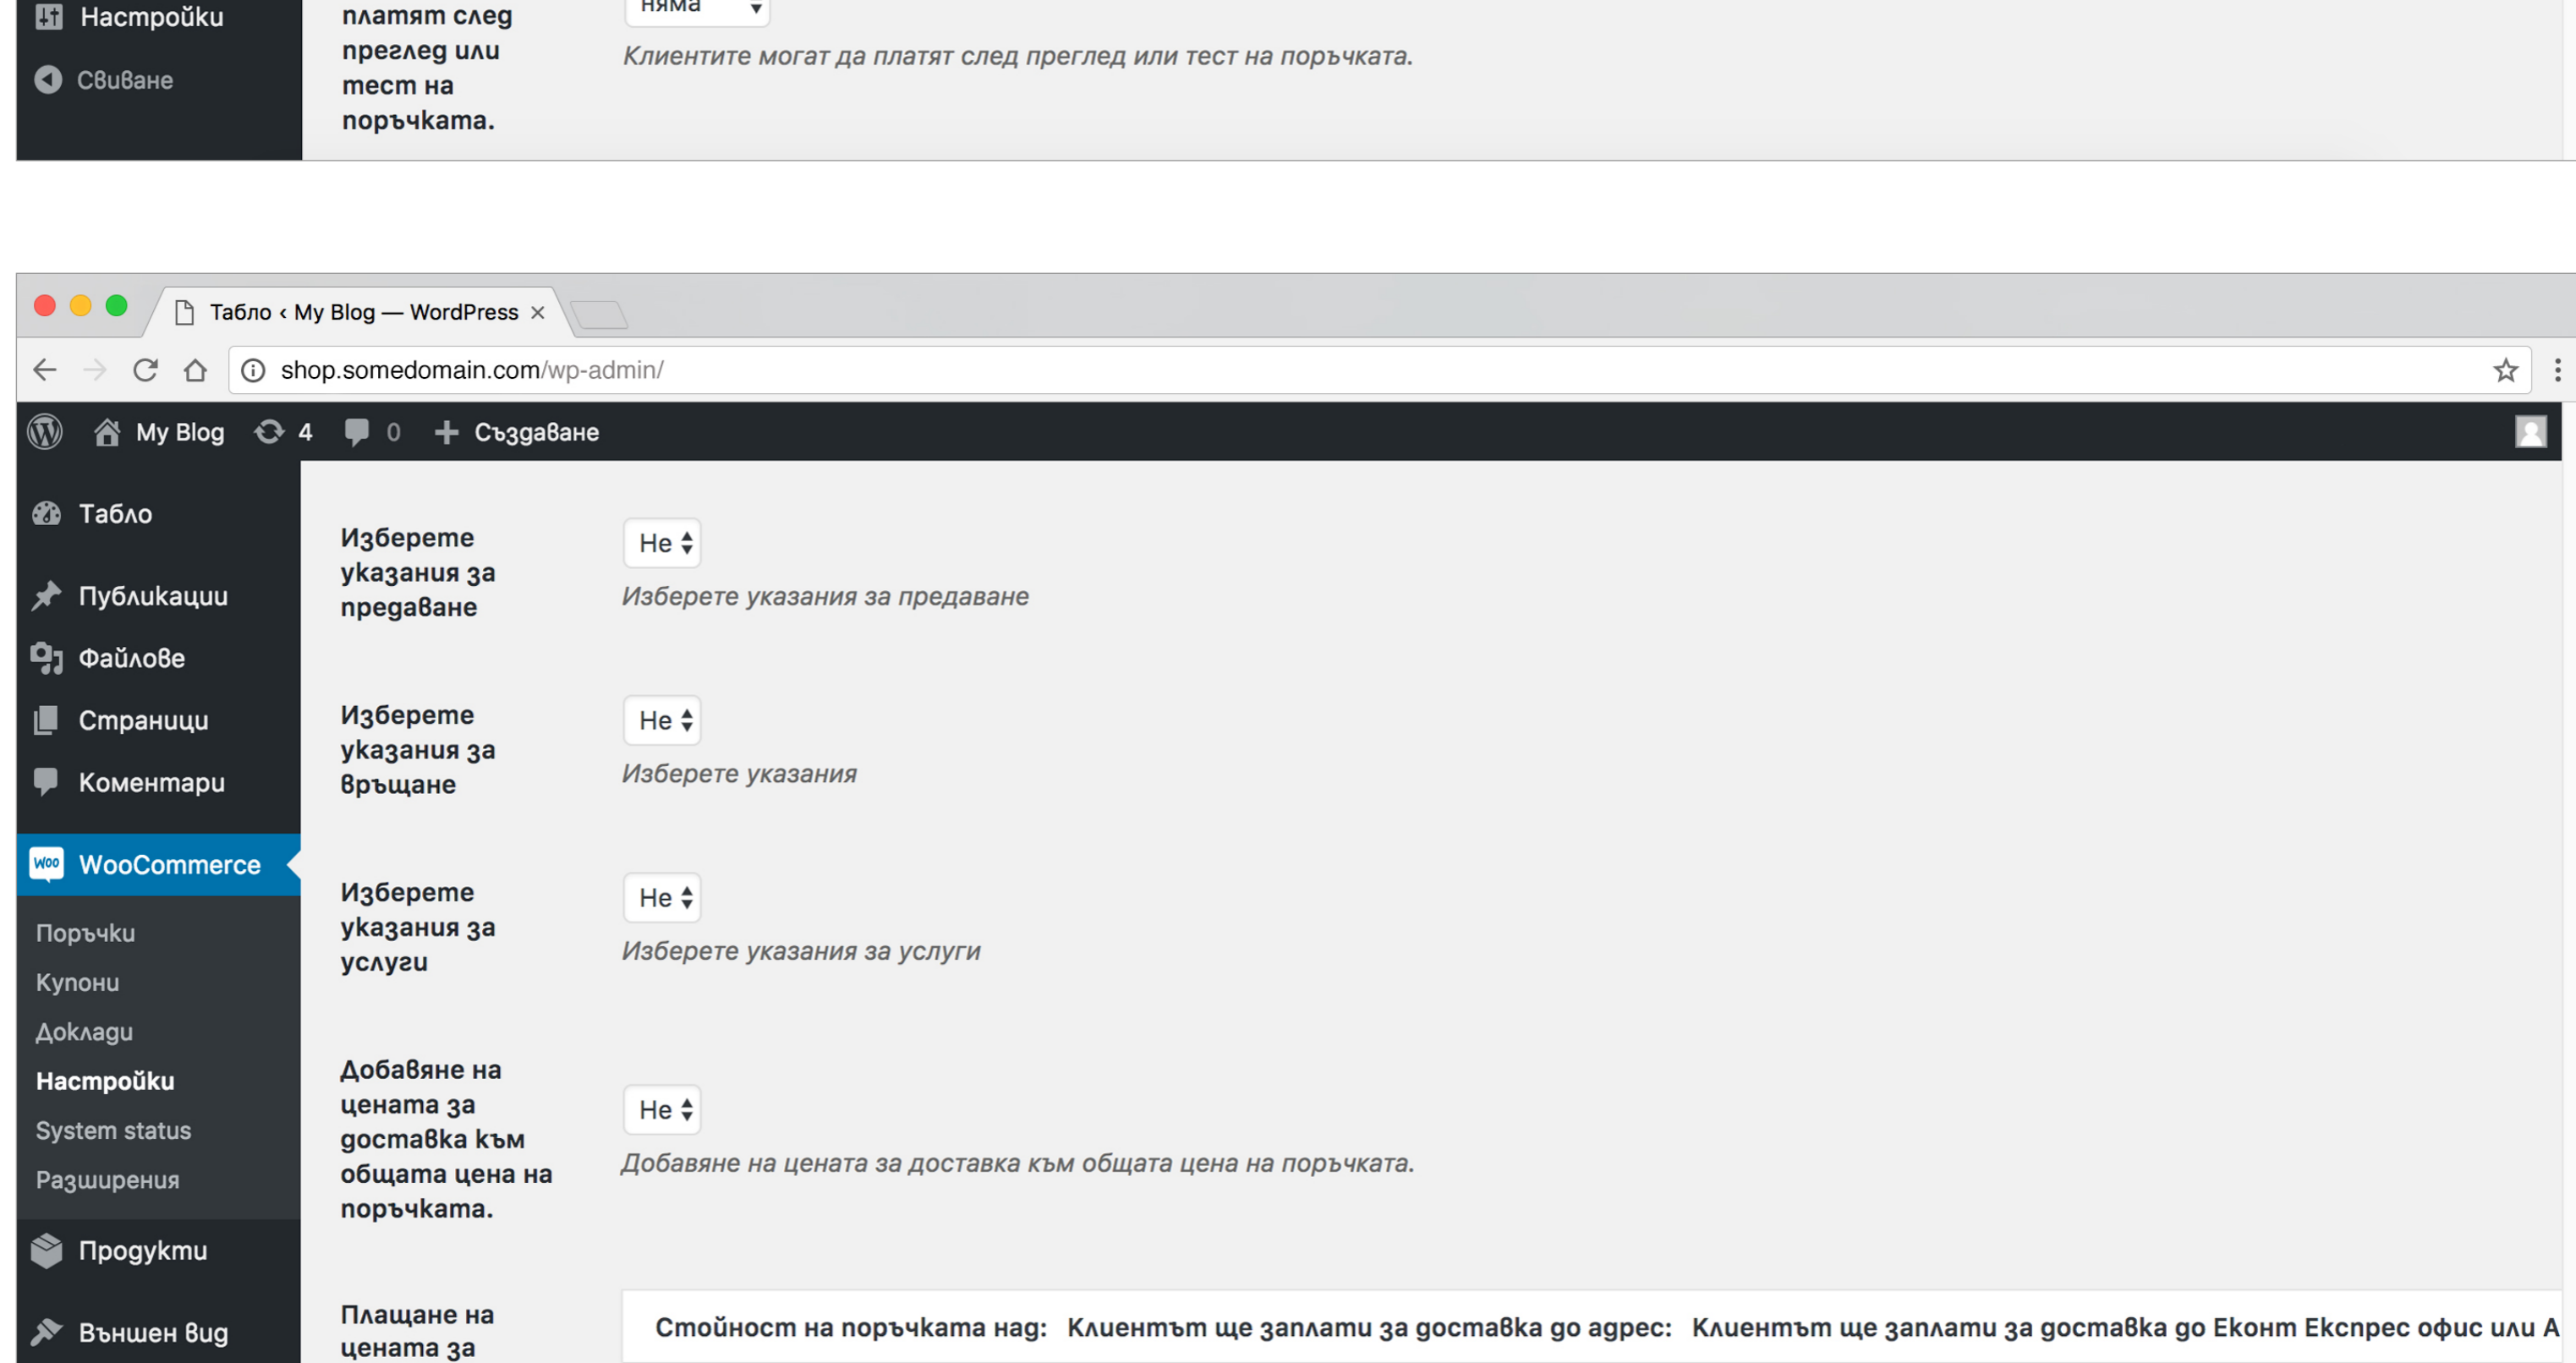

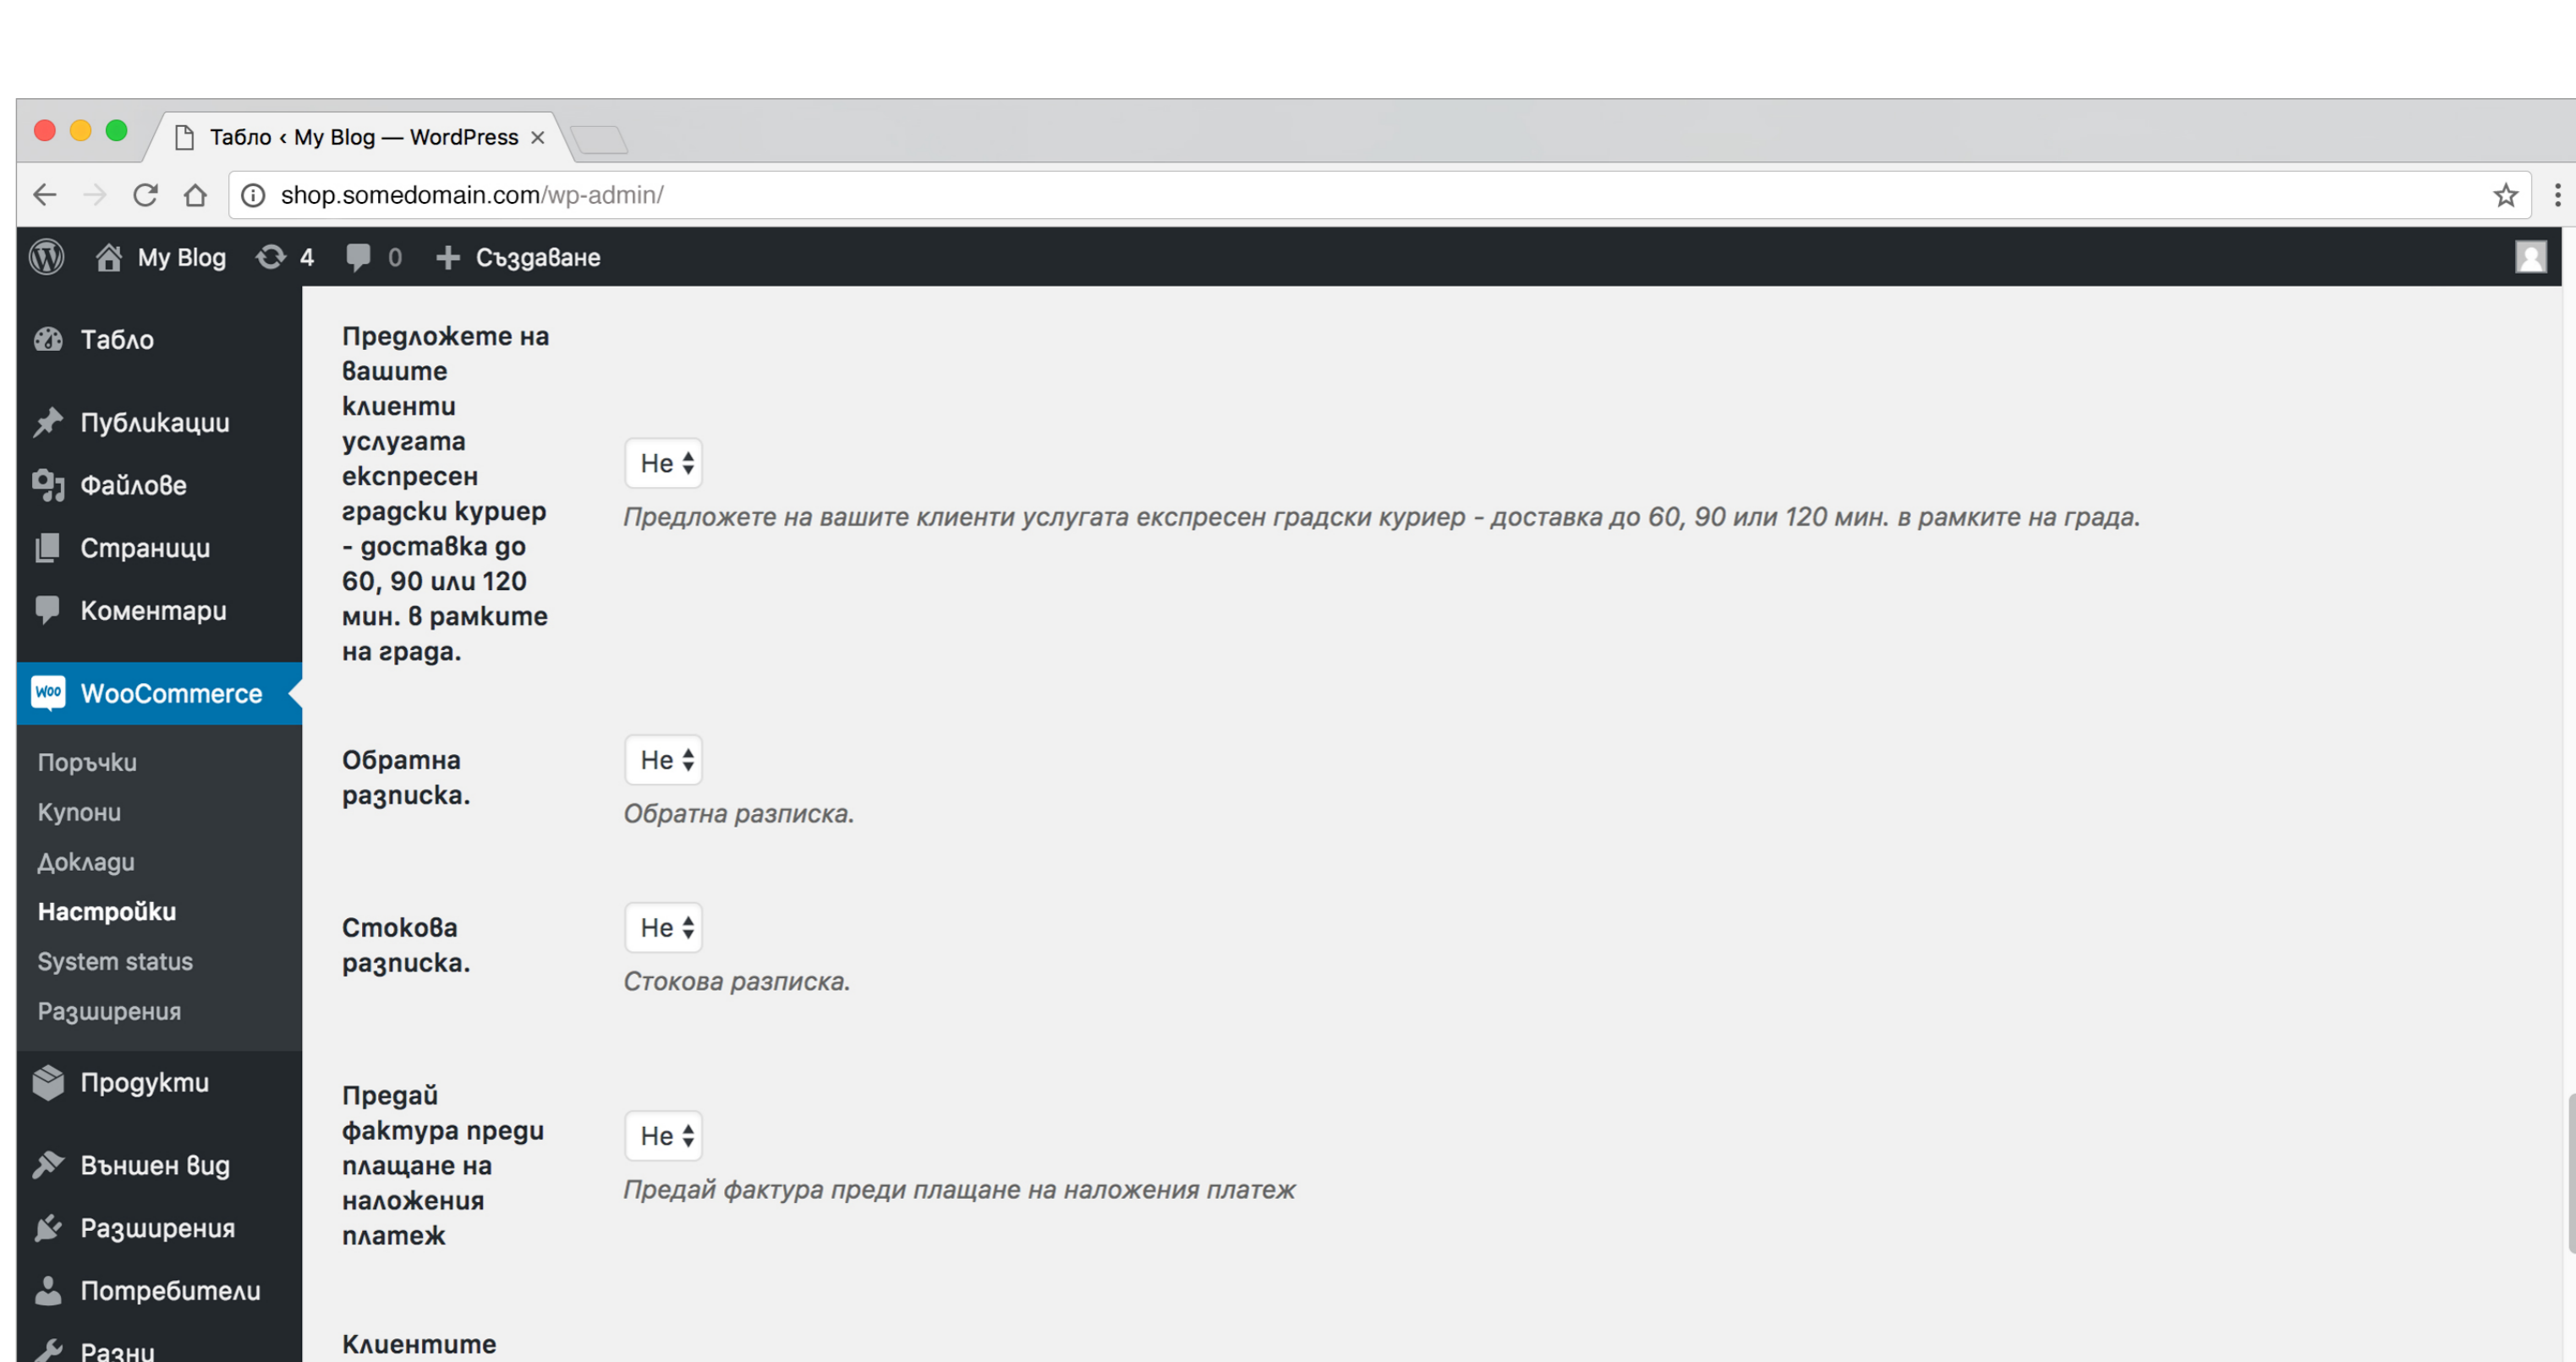

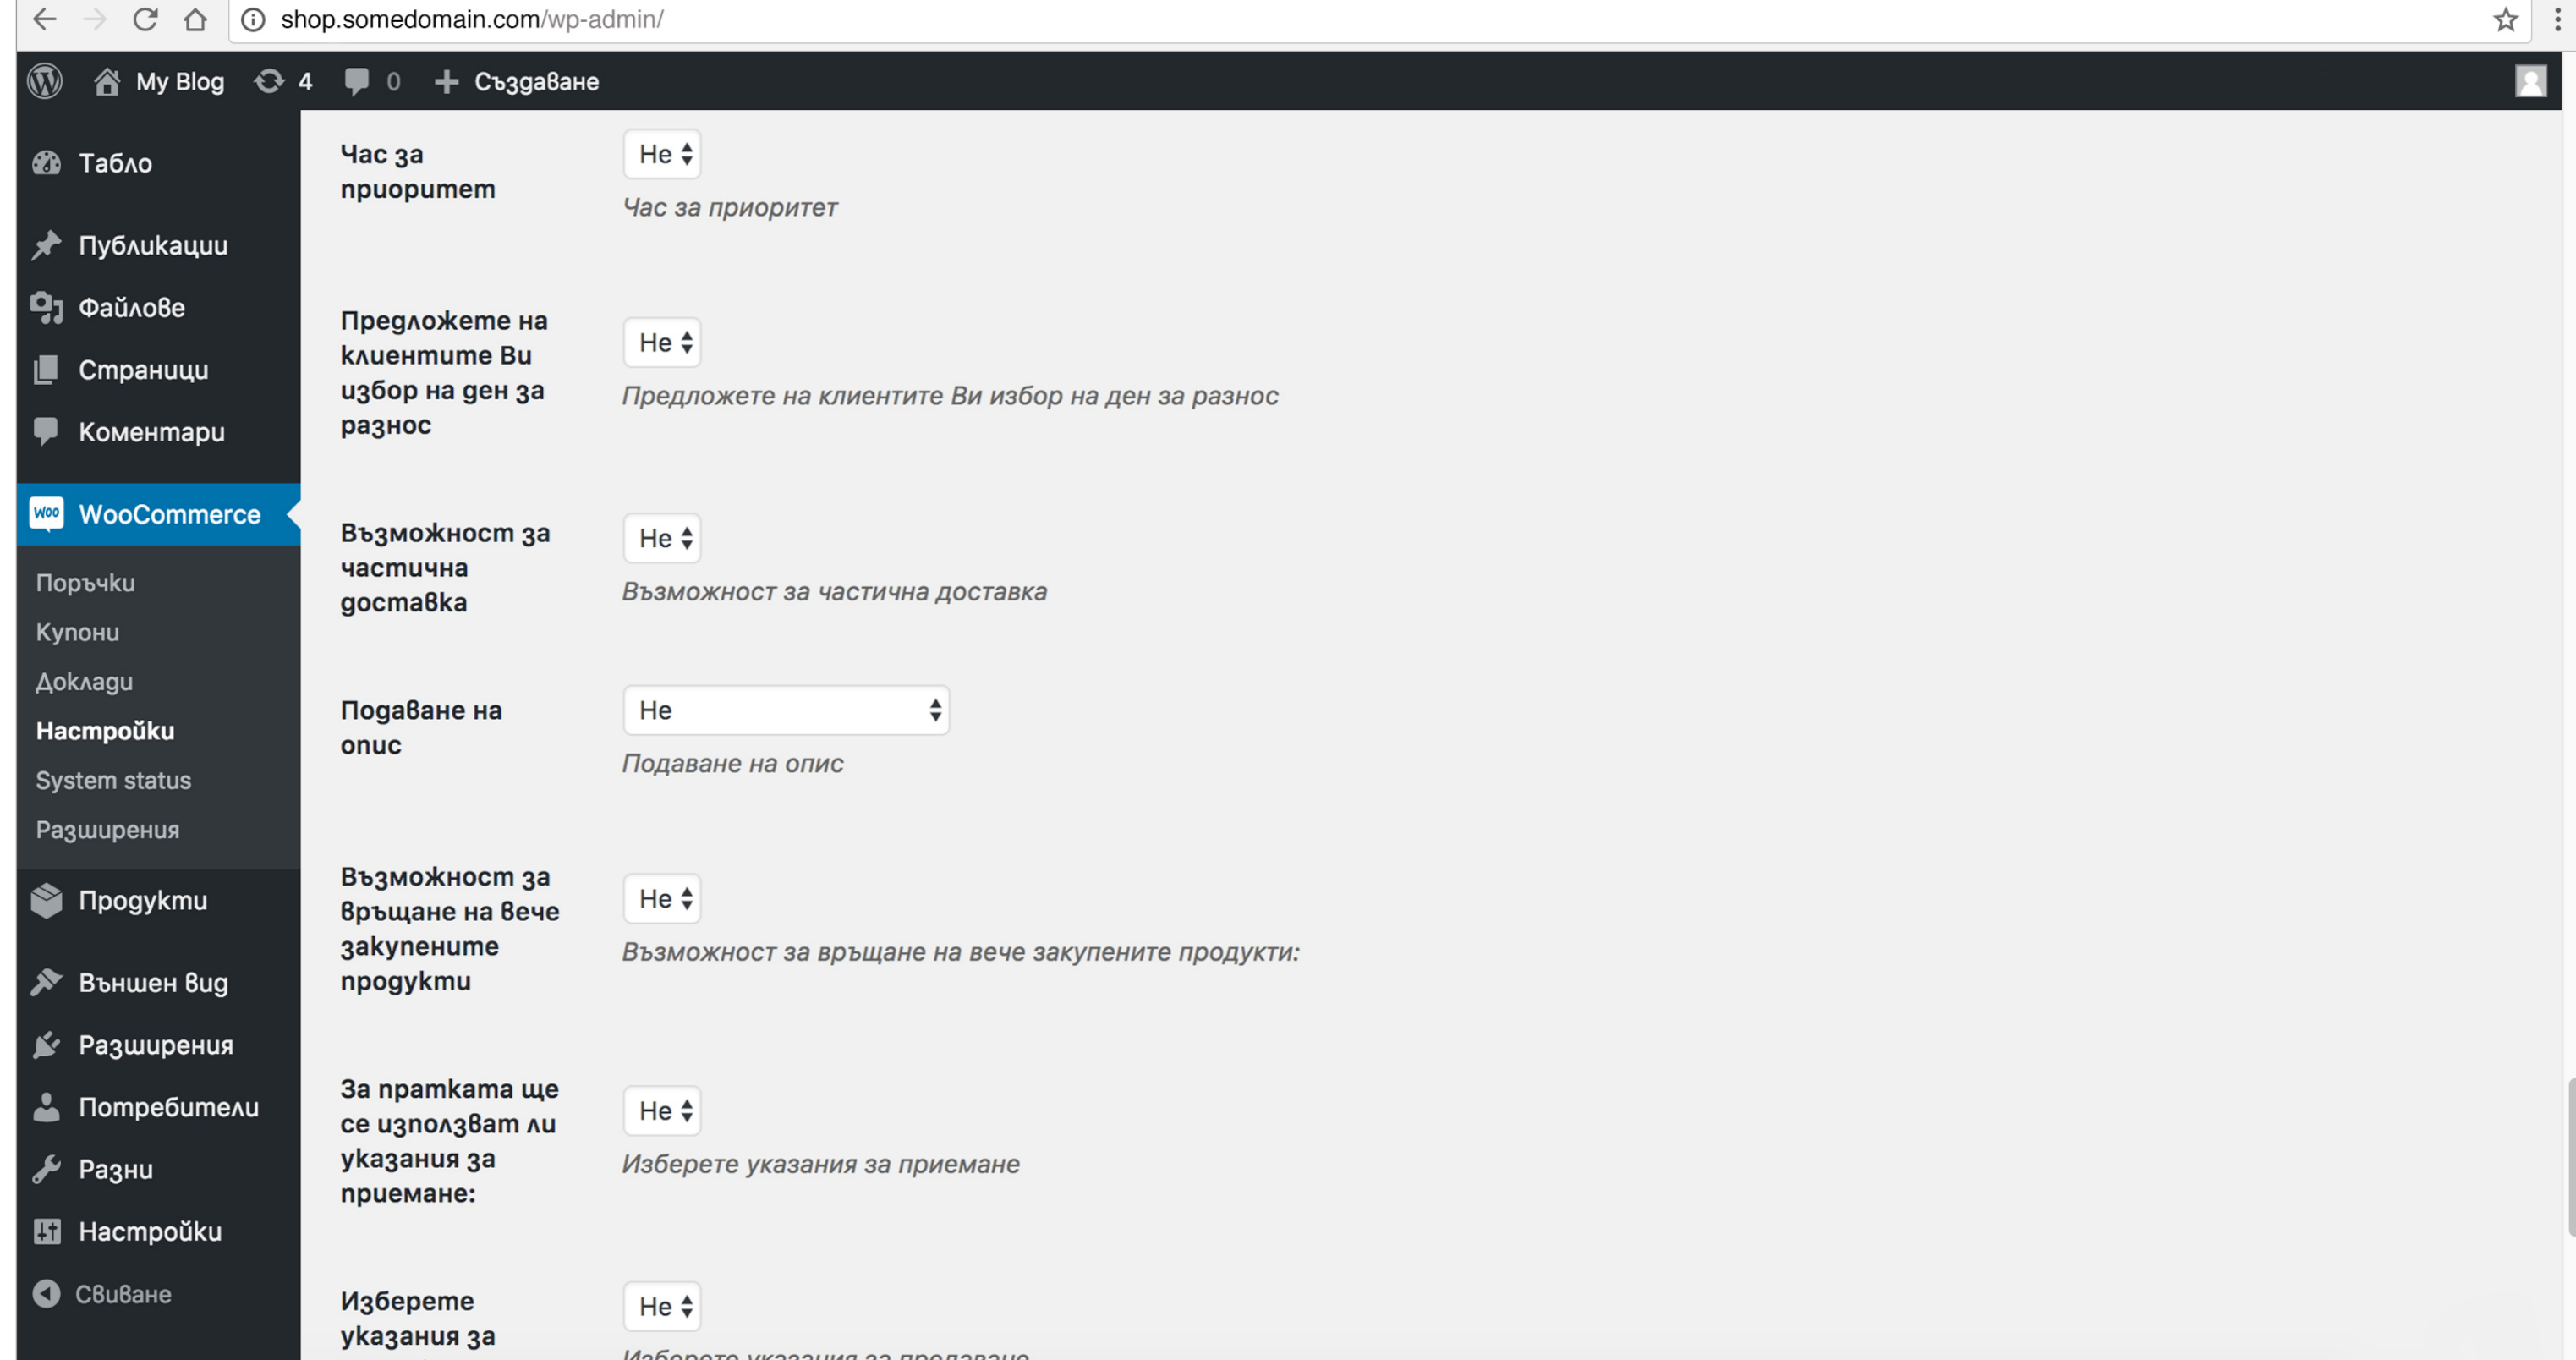

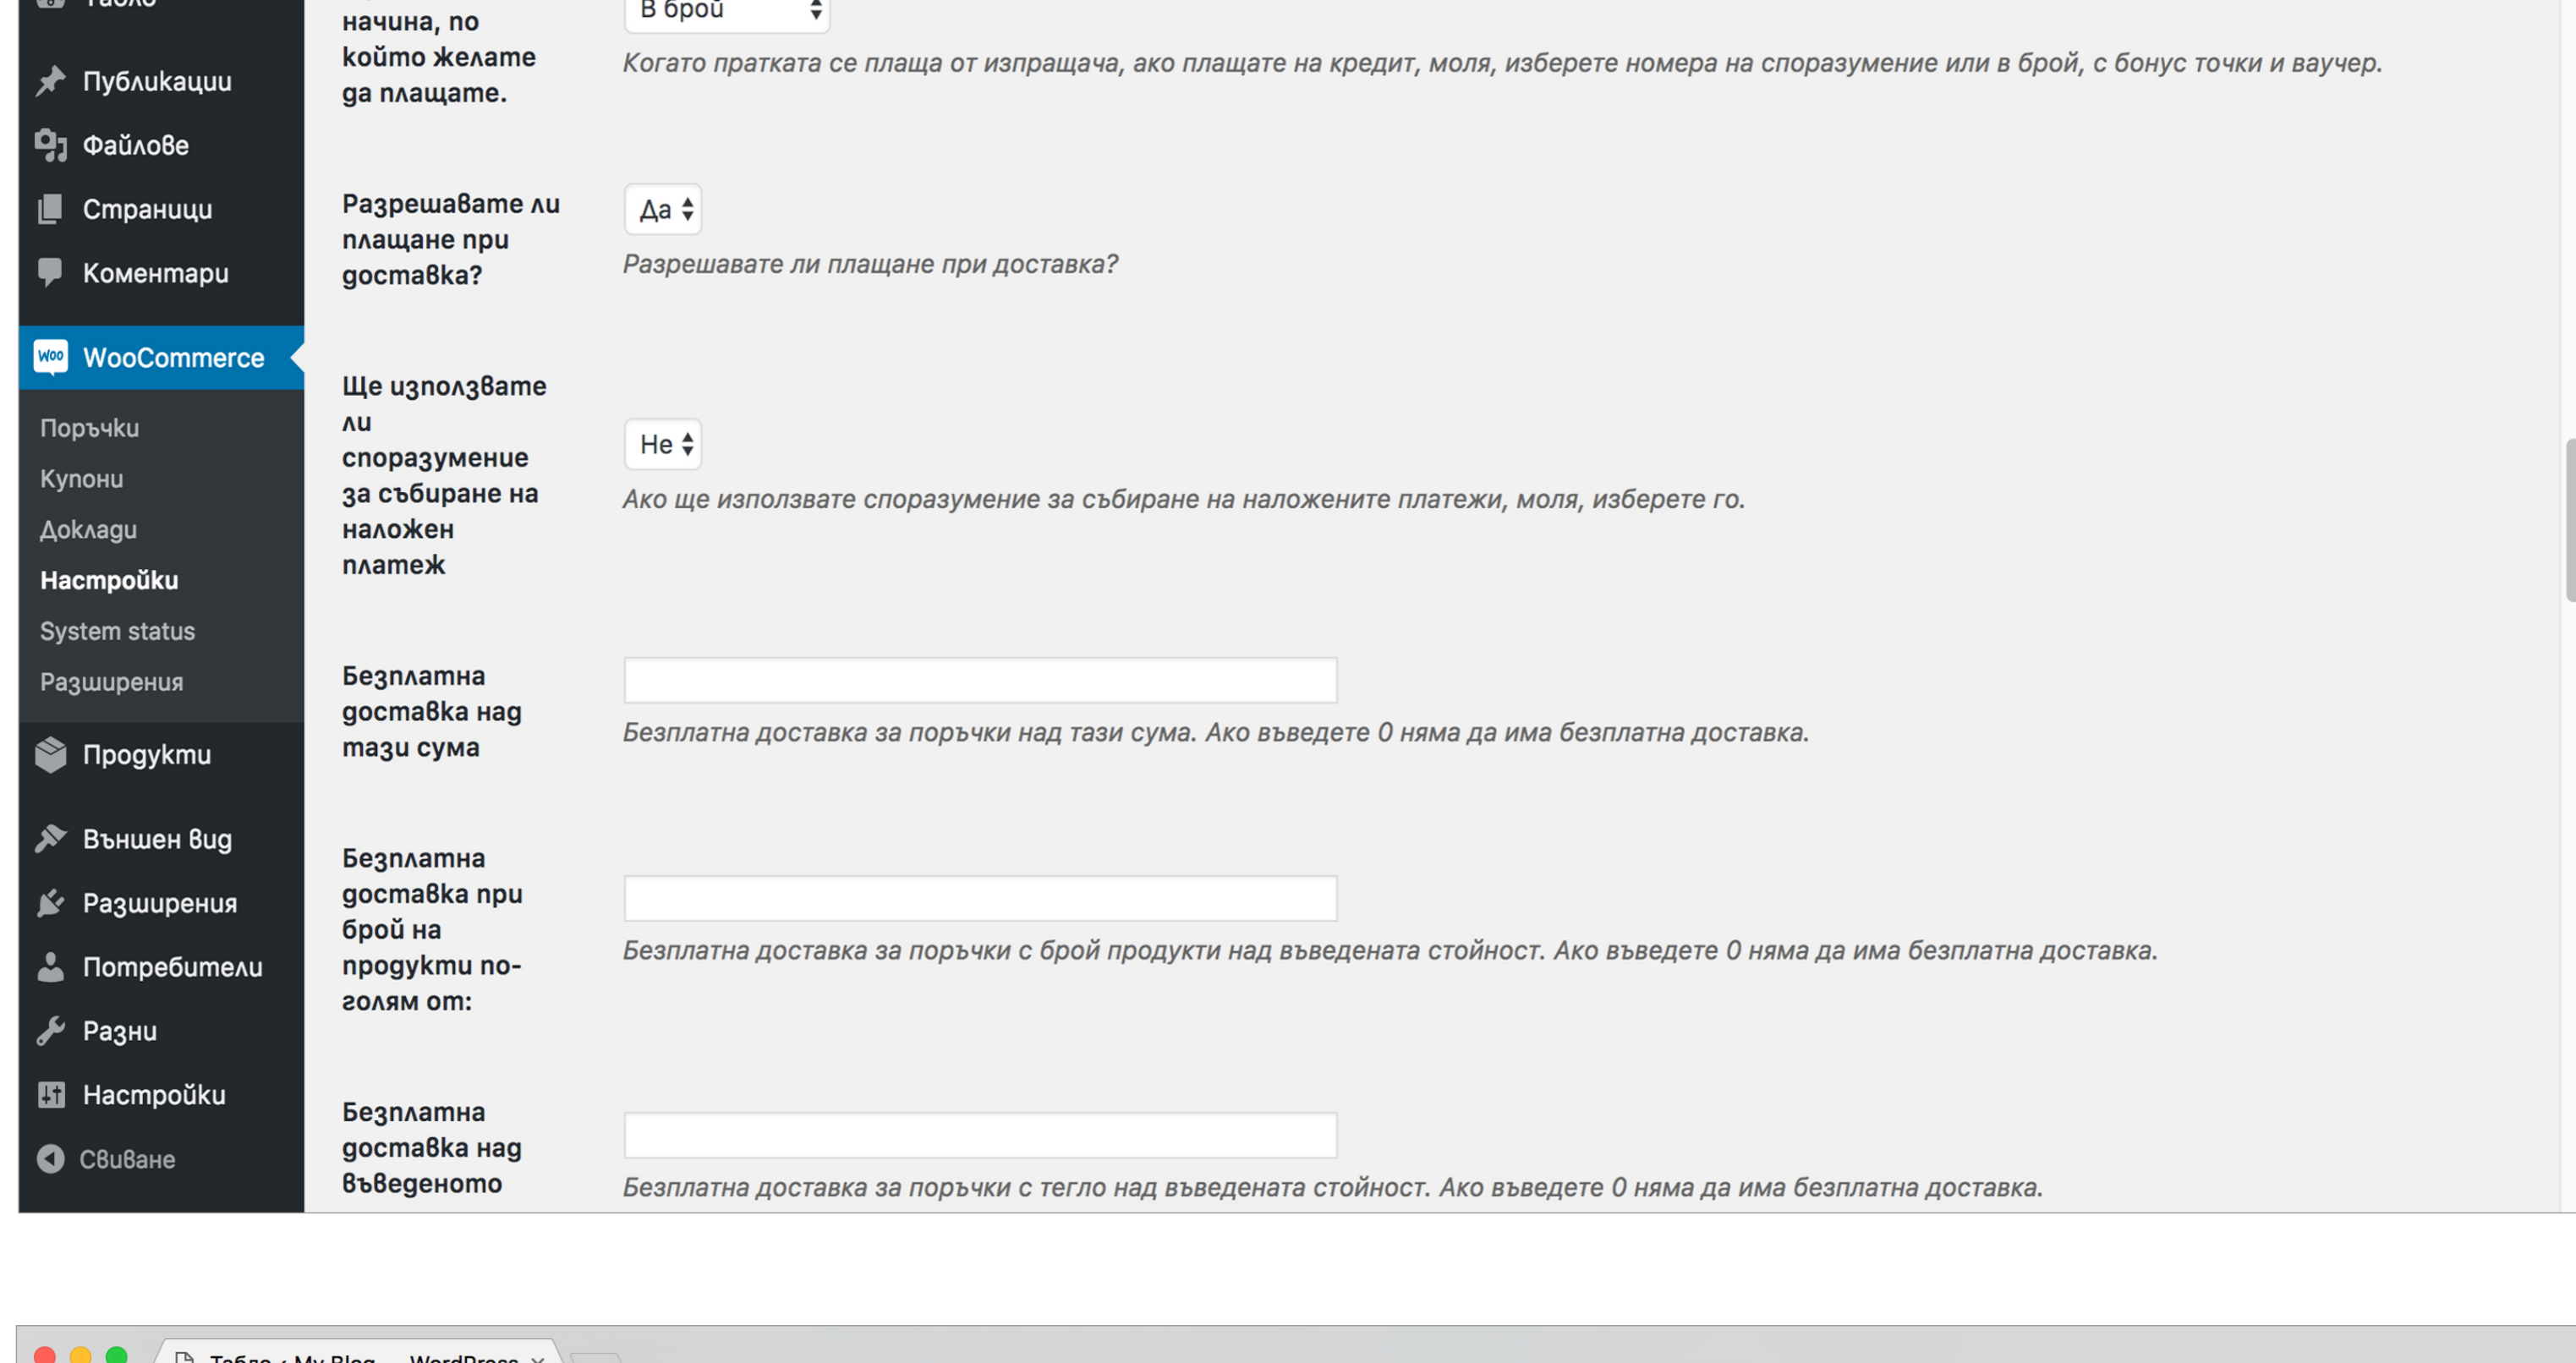

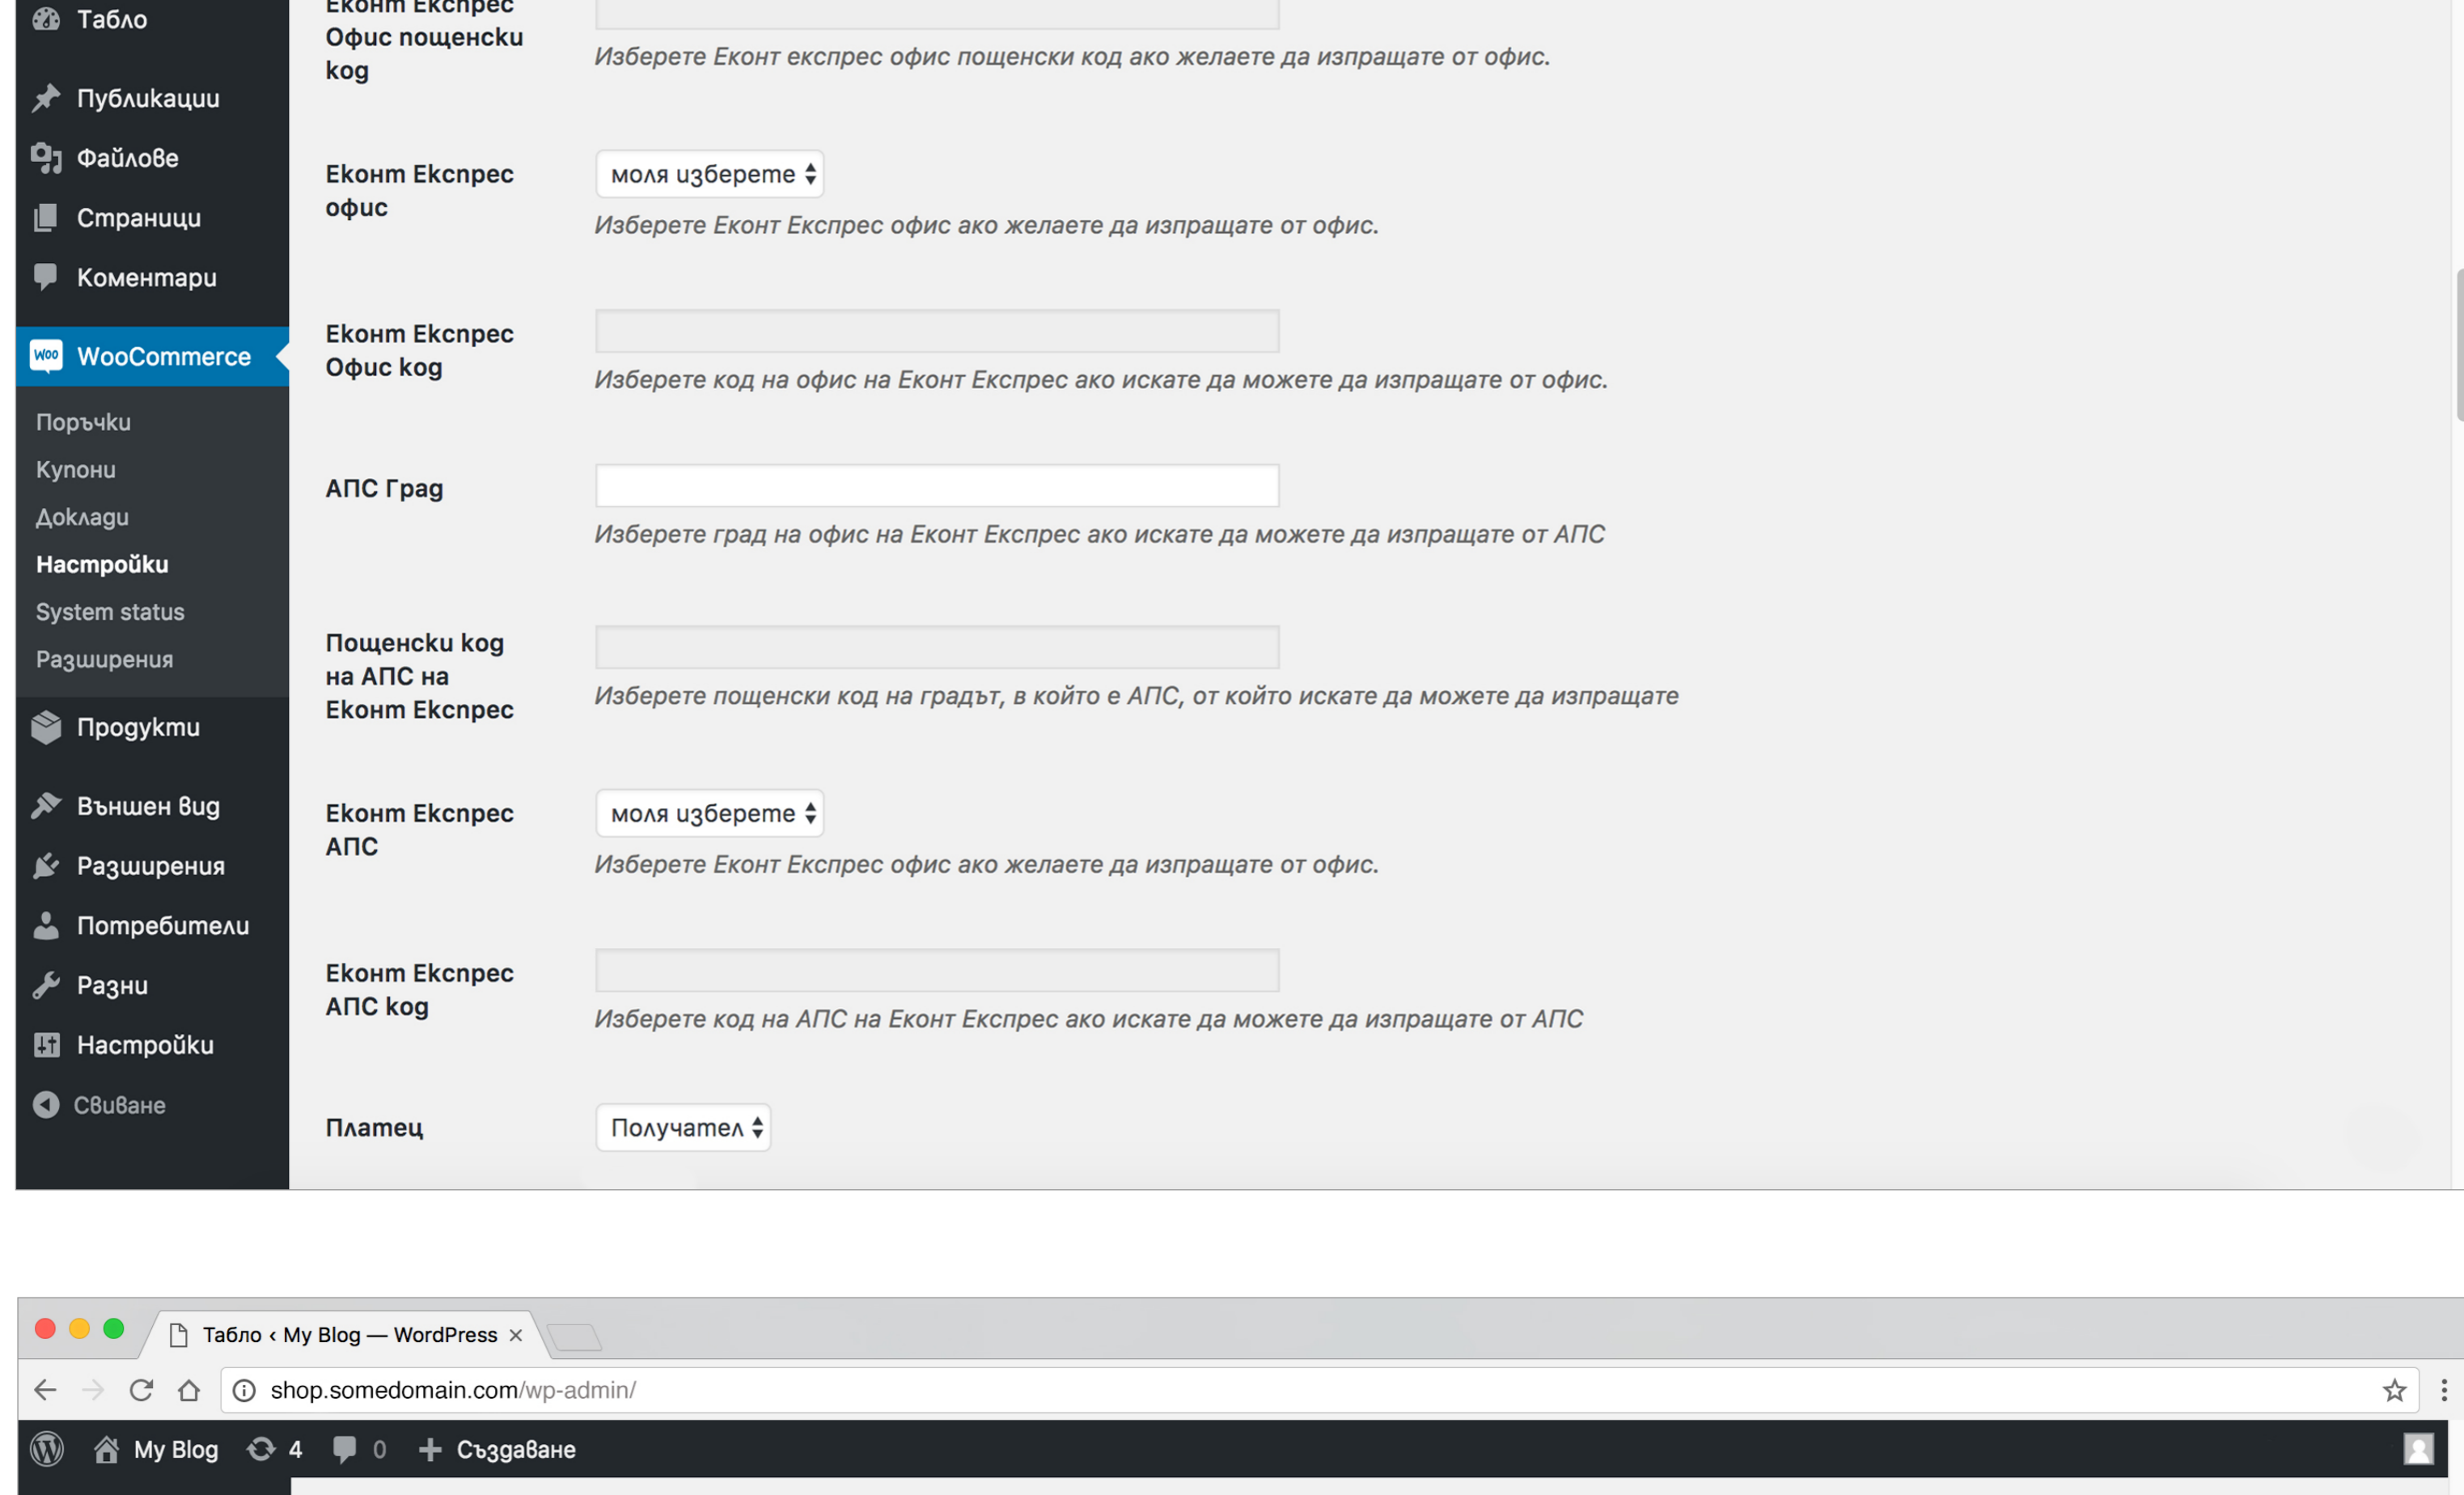

### Step 4

- Complete the fields in the same way as they are in your Econt profile:

- Company
- Name
- Telephone

### Step 5

- Complete the fields until the end of the screen as you like according to the needs of your e-shop.
- Press the *Запазване на промените* button at the bottom of the page..

With this last step your e-shop from Wordpress has been fully integrated with Econt.
